

# Phase 1 RBC Survey Results

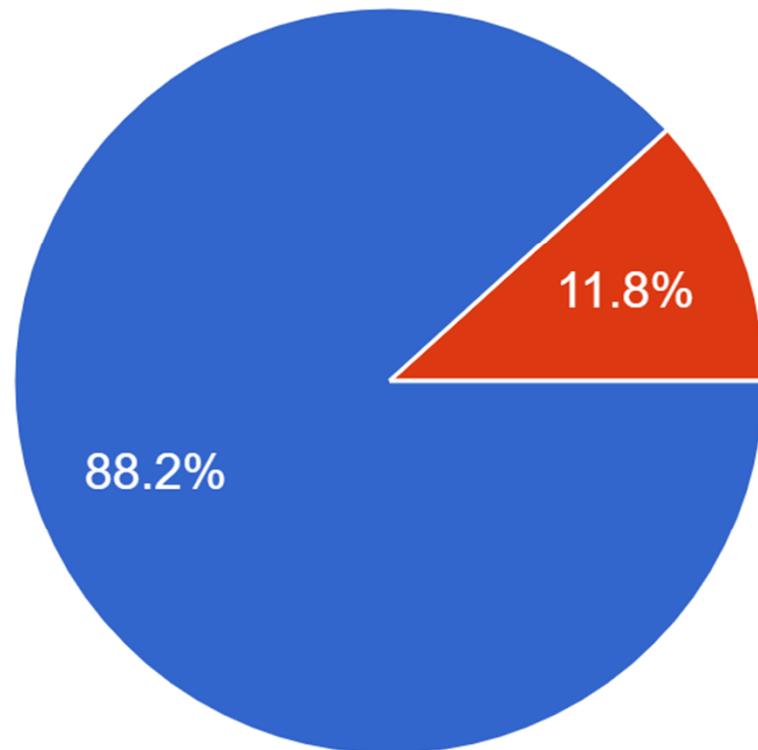

# Phase 1 Survey Results

- Do you think the information presented in Phase 1 has given you a sufficient level of understanding to make informed planning-level decisions as we move into Phase 2? If not, please list any topics that you, or the RBC in general, might benefit from hearing about, or more about.
  - a. Yes, it was a good introduction. I learn more by doing, so I think it will all click once we get into the planning.
  - b. I have appreciated all of the presentations that have been given to date. They have covered a wide variety of topics that will provide the council with a strong foundation moving forward.
  - c. Yes. Since I am not familiar with water terminology, I will need to work to improve my understanding of the definitions.
  - d. I feel the diverse subject matter has given me an overall fair understanding.

# Phase 1 Survey Results

- Do you feel that you have an adequate understanding of how data, models, and other tools will be used to assess water availability, identify shortages, and explore surface water issues and concerns during Phase 2?

- Yes, I generally understand how the data, models, and other tools will be used
- No, I need more details on how the data, models, and other tools will be used

# Phase 1 Survey Results

- Based on the RBC meetings held to date, do you have any suggestions for the Facilitator or Planning Team to consider that might improve the meetings or planning process?
  - a. Given that the objective of Phase 1 was to inform the RBC and introduce us to the terminology, measurement systems, water users, etc., I think the meetings were planned well and ran well.
  - b. No. These are some of the most efficiently run and digestible meetings I've been a part of. I wouldn't suggest changing. I feel the diverse subject matter has given me an overall fair understanding.
  - c. The end of classes could use more interaction with RBC members to make sure everyone is clear on the subject matter just covered.
  - d. Are there reference materials that could provide additional help with improving understanding of the processes?

*Representative responses (not all responses shown)*

# Phase 1 Survey Results

- If you have any other thoughts, concerns, or feedback on the Broad River basin planning process, please provide them below.
  - a. I was surprised that we are only concerned with water quantity, and not quality. Will the RBC focus on quality in a later phase? Also, I believe water management and soil management are linked. Is there a similar effort underway to plan soil management?
  - b. I would like to hear more about the completion of the Framework, how it will be implemented, and will it be in stages?
  - c. Continue moving the meetings around and doing field trips.
